## PROJECT NOTIFICATION – Streetlight Replacements on Army Navy Dr from Memorial Dr to S Lynn St

Dear Resident,

Changes are coming to the streetlights on your block as part of Arlington County's Streetlight Management Plan, which guides the enhancement of our streetscapes, updates lighting standards, and improves outage response times by clarifying maintenance responsibilities.

As of January 27, 2025, Dominion Energy crews began installing 16 overhead LED lighting (Cobra heads) along Army Navy Drive from Memorial Drive to South Lynn Street. Four of these headlights will be mounted on existing wood poles, with the remaining 11 being mounted on new poles. The overhead lighting offers a more appropriate style of residential lighting that maximizes downward light and limits spillback.

Overhead LED streetlights produce uniform distribution, creating safer roadways and sidewalks for all users. They also have a longer usable life and use almost 75% less energy, making them less expensive to operate and maintain.

**Streetlight replacements are estimated to be completed by April 18, weather permitting.** The installations will occur on weekdays during daytime hours (8 a.m.-4 p.m.) The new lighting will be installed before disconnecting the old lighting to ensure the street is always illuminated. Streetlights will be tested to ensure County standards and specifications are met.
